

CURRICULUM VITAE

Leadership Summary

Senior research executive and sociologist with over 20 years of experience leading large, externally funded research programs in partnership with universities, federal agencies, and foundations. Serve as Senior Director within a multidisciplinary center, with responsibility for strategic planning, personnel leadership, budget oversight, proposal development, and external engagement. I have skills in strategic planning, research program development, and organizational leadership, and maintain an active research portfolio. I have been responsible for guiding proposal development, coordinating multi-institution research teams, and translating research findings into practical insights that inform policy and operational decision-making. These experiences have shaped my leadership approach, which emphasizes collaboration, intellectual rigor, mentorship, and the application of high-quality social science research to address complex public policy challenges. My work has involved directing large research initiatives, overseeing budgets and personnel, mentoring early- and mid-career researchers, and building collaborative partnerships with federal agencies, foundations, and academic institutions. Alongside these leadership roles, I have published in criminology and sociology journals, including *American Sociological Review*, *British Journal of Criminology*, *Criminal Justice and Behavior*, *Criminology and Public Policy*, and *Justice Quarterly*.

Education

MS, Criminal Justice Studies, Eastern Kentucky University, Richmond, KY, 2000.

BS, Criminal Justice Studies (minor in Political Science), Eastern Kentucky University, Richmond, KY, 1998.

Professional Experience

Ponte Research & Policy, Apex, NC

2026–present. Founder & Principal

Founded an independent research and consulting firm that applies social science methods to criminal legal system policy and practice. Provides program evaluation, policy analysis, research design, and data strategy for public agencies, nonprofits, and foundations, drawing on more than two decades of experience in pretrial decision-making, community supervision, risk assessment, and criminal justice data infrastructure. Ponte, Italian for “bridge,” reflects the firm’s focus on connecting rigorous evidence with the practitioners and policymakers who use it.

RTI International, Research Triangle Park, NC

2026–present. Principal Scientist

Leads large-scale research initiatives on the criminal legal system, focusing on criminal justice data infrastructure, pretrial decision-making, violence prevention, and extremism research. Serves as principal investigator on federally funded projects and contributes to strategic research development across RTI’s justice and public safety portfolio.

2018–2025. Senior Director, Center for Criminal Legal Systems Research

Led a multidisciplinary research center of approximately 50 researchers conducting policy-relevant studies on the criminal legal system. Responsible for strategic planning, personnel leadership, budget oversight, and external partnerships. Oversaw a portfolio of competitively funded projects supported by federal agencies and foundations, including initiatives funded by the National Science Foundation, Bureau of Justice Statistics, National Institute of Justice, Department of Homeland Security, and Arnold Ventures.

2013–2018. Research Sociologist → Senior Research Sociologist

Conducted research on pretrial decision-making, community supervision, criminal justice data systems, and risk assessment tools. Served as investigator and project lead on multiple federally funded studies and collaborated with federal, state, and local agencies to translate research findings into policy-relevant insights.

The Pennsylvania State University, University Park, PA

2011–2013. Postdoctoral Research Scholar, Justice Center for Research, Department of Sociology

Conducted research on policy-relevant issues facing corrections, community supervision, and the courts, including comparative analyses of correctional policies and institutional practices.

Council of State Governments / American Probation and Parole Association, Lexington, KY

2001–2011. Senior Research Associate

Developed and managed federally funded research projects focused on community corrections systems, including officer workload, supervision practices, and organizational capacity. Produced national reports, peer-reviewed publications, and practitioner tools, and provided technical assistance to correctional agencies across the United States.

Externally Funded Experience

To date: Funding totaling approximately \$50,000,000 (rounded) as co-PI or PI.

Modeling the Criminal Case Process with State and Local Data (2025 to date)—*Principal Investigator*.

This project will demonstrate the feasibility and value of using privacy-preserving record linkage (PPRL) to integrate criminal justice data for case processing research. Working in partnership with the Bureau of Justice Statistics (BJS) and the National Science Foundation (NSF), RTI, partnered with Datavant, will use a tokenization algorithm to link case- and person-level records without exposing personally identifiable information. **Role:** PI. **Funding source:** National Science Foundation. **Amount:** \$590,000. **Duration:** 2025-2026

Mapping the Continuum of Support for Violent Extremism in the United States (2024 to date)—

Principal Investigator. Funded by the National Institute of Justice. Research to field a national survey on support for violent extremism and overlaying the results onto a synthetic population of the United States. This methodology allows for analyses that involve the spatial distribution of support for violent extremism and other factors of theoretical and practical importance. **Role:** PI. **Funding source:** National Institute of Justice, DOJ. **Amount:** \$1,200,000. **Duration:** 2024-2027

Annual Surveys of Probation and Parole (2015 to date)—*Principal Investigator*. This study comprised two separate data collections through which the Bureau of Justice Statistics obtained summary statistics (at the national and state level) on the number of adults under probation and parole supervision, the number of entries to and exits from supervision, and characteristics of the population supervised. The data were obtained from administrative sources of approximately 450 probation reporters (including some that report for multiple agencies) and 55 parole agencies via web surveys. Responsible for questionnaire

development and all technical, budget, quality, and managerial aspects of the study. **Role:** PI. **Funding source:** Bureau of Justice Statistics, DOJ. **Amount:** \$6,000,000. **Duration:** 2015-2026

National Pretrial Reporting Program (2021 to date)—*Principal Investigator*. Responsible for the management and scientific direction of this Bureau of Justice Statistics collection to document the processing of felony cases in the 200 largest jurisdictions in the United States. Through this project, RTI and partners will determine the ability of agencies to provide data about pretrial release and detention, document the policies shaping pretrial release and detention, and collect case-level information from a sample of the largest jurisdictions. **Role:** PI. **Funding source:** Bureau of Justice Statistics, DOJ. **Amount:** \$3,000,000. **Duration:** 2021-2025

A Prospective Longitudinal Analysis of Extremism Exit (2022 to 2025)—*Principal Investigator*. The purpose of this project, funded by the National Institute of Justice, is to contribute to an evidence base to support the development and scaling of effective terrorism prevention programs. This project includes three broad, interconnected phases that will be executed by a research team and one of the few U.S.-based nongovernmental counterterrorism programs. RTI (and partners) will develop interview protocols and survey instruments to use to develop a prospective longitudinal dataset of up to 100 individuals exiting extremist groups in the United States. **Role:** PI. **Funding source:** National Institute of Justice, DOJ. **Amount:** \$1,600,000. **Duration:** 2022-2025

Modeling Human Behavioral Responses After Targeted Attacks at Soft Targets & Crowded Spaces (2022 to 2025)—*Principal Investigator*. Funded by the Department of Homeland Security. This research uses agent-based modeling to simulate how civilians and first responders react to acts of targeted violence involving improvised explosive devices and active shooters. Models of various real-world and virtual environments identify practical security insights for those protecting and visiting soft targets and crowded places. **Role:** PI. **Funding source:** Science and Technology Directorate, DHS. **Amount:** \$5,000,000. **Duration:** 2022-2025

Research in Support of Advancing Pretrial Policy and Research: A Project of the National Partnership for Pretrial Reform (2019 to 2024)—*Project Director*. Responsible for the management and oversight for this multi-site, multi-year research, funded by Arnold Ventures, that seeks to improve pretrial risk assessment, practice, and outcomes. Activities include validation and improvements of the Public Safety Assessment (PSA) tool, as well as research into the decision-making context within which pretrial decisions occur. **Role:** Co-PI. **Funding source:** Arnold Ventures. **Amount:** \$12,000,000. **Duration:** 2019-2025

Evaluate Prevention Programming and Identify Best Practices Undertaken by Allies Abroad (2021 to 2023)—*Principal Investigator*. This effort, funded by the Department of Homeland Security, sought to evaluate current prevention programs, domestic and international, to research best practices in interventions, reintegration, and counter-recidivism. This effort informed threat assessments, interventions, and counter-recidivism programs to determine their effectiveness, evaluate their efficacy, and identify best practices undertaken by allies abroad, to understand the similarities and differences in the known process of radicalization and mobilization for terrorism as compared to targeted violence. RTI used a Delphi method to aggregate expert views on terrorism prevention programming, implementation, and evaluation. **Role:** PI. **Funding source:** Science and Technology Directorate, DHS. **Amount:** \$700,000. **Duration:** 2021-2023

Countering Foreign Influence Survey (2021 to 2023)—*Principal Investigator*. RTI developed a longitudinal survey for the Department of Homeland Security to assess the impact of foreign and

domestic mis-, dis-, and mal-information campaigns; public opinion or attitudes on election security; and media literacy techniques engaged by the public. The project's findings and recommendations will provide the department with a deeper understanding of the public's media literacy activities to learn whether people verify sources, if they find multiple viewpoints, and how they come to trust various sources of information. **Role:** PI. **Funding source:** Science and Technology Directorate, DHS. **Amount:** \$2,300,000. **Duration:** 2021-2023

An Evaluation of Countering Violent Extremism Programs (CVE) (2018 to 2023)—*Principal Investigator*. Responsible for the management and scientific direction of a multi-site evaluation of CVE programs funded by the Department of Homeland Security. The programs are administered by local and state governments and nongovernmental organizations that are applying strategies to prevent and intervene in radicalization processes. **Role:** PI. **Funding source:** Science and Technology Directorate, DHS. **Amount:** \$3,000,000. **Duration:** 2018-2023

Evaluation of the Public Safety Assessment (2015 to 2021)—*Principal Investigator*. The PSA was developed by Arnold Ventures to provide pretrial releasing authorities with a structured classification tool to inform pretrial release decisions. The PSA responds to a major need for a structured decision-making tool to assist in reducing jail populations and mitigating the collateral consequences of pretrial detainment such as loss of employment, separation from family, and disruption of adherence to medications. This project validated the PSA through evaluations of the processes, outcomes, and related impacts of the PSA. **Role:** PI. **Funding source:** Arnold Ventures. **Amount:** \$450,000. **Duration:** 2015-2021

Research and Evaluation on Domestic Radicalization to Violent Extremism: Supporting Exit USA (2015 to 2019)—*Principal Investigator*. The aim of this project was to conduct approximately 50 in-depth interviews with former right-wing extremists to understand the radicalization process and uncover exit patterns. The goal of the project was to provide a research foundation to support the development of materials used by a nongovernmental organization, Life After Hate, as it created the Exit USA program. **Role:** PI. **Funding source:** National Institute of Justice, DOJ. **Amount:** \$750,000. **Duration:** 2015-2019

Evaluation of the MacArthur Foundation Safety + Justice Challenge (2014 to 2019)—*Project Director*. The Safety + Justice Challenge (SJC) supported a network of competitively selected local jurisdictions committed to reducing over-reliance on jails in their communities. RTI conducted a multifaceted evaluation at multiple levels of the initiative to document the impacts and lessons learned of reform. Helped create and implement the evaluation design and methodology, planned and interpreted analyses, and interacted with staff from the Foundation and partners. **Role:** co-PI. **Funding source:** MacArthur Foundation. **Amount:** \$8,000,000. **Duration:** 2014-2019

Evaluation of the HOPE Demonstration Field Experiment (2014 to 2017)—*Cost/Workload Task Lead*. Responsible for all aspects of this implementation, outcome, and cost-effectiveness study of the Honest Opportunity with Enforcement (HOPE) Demonstration Field Experiment. The goal of the field experiment, conducted in four sites, was to provide a rigorous test of the deterrent effects of swift and certain sanctions. **Role:** task lead. **Funding source:** National Institute of Justice, DOJ. **Amount:** Did not work on proposal. **Duration:** 2014-2017

Sentencing Risk Assessment Development: Pennsylvania Commission on Sentencing (2012 to 2014)—*Principal Investigator*. The aim of this project was to provide initial data analysis of 5 years of sentencing data for high-risk offenders to inform risk assessment development to structure judicial decision making. The project used multiple quantitative analysis techniques, but recidivism analysis relied on survival analysis and count data models. **Role:** PI. **Funding source:** Pennsylvania Commission on Sentencing. **Amount:** \$50,000. **Duration:** 2012-2014

Institutional and Organization Framework to Understand the Implications of Probation Officer Tasks (2012 to 2013)—*Principal Investigator*. The aim of this project sponsored by the Indiana Judicial Center was to calculate workload requirements across 25 adult and juvenile probation departments. The project relied on semistructured telephone interviews with probation chiefs, officer surveys, and a time and motion study. **Role:** co-PI. **Funding source:** Bureau of Justice Assistance, DOJ. **Amount:** \$600,000. **Duration:** 2012-2013

Development of Risk Assessment Tools, Curriculum, and Training for DUI Community Supervision (2010)—*Principal Investigator*. The National Highway Traffic Safety Administration funded this project to develop a risk assessment instrument for probation officers to use to predict DUI recidivism. The initial analysis relied on state-level data of nearly 3,800 probationers and parolees convicted of DUI. An instrument, the Impaired Driver Assessment, was developed and has been used in four states. **Role:** co-PI. **Funding source:** National Highway Traffic Safety Administration, DOT. **Amount:** \$800,000. **Duration:** 2014-2019

Workload Allocation for Public Safety: Phase II (2009)—*Principal Investigator*. The aim of this project for the Bureau of Justice Assistance (BJA), U.S. Department of Justice, was to develop tools to assist community corrections agencies to conduct workload evaluations. This project relied on several focus groups and analysis of numerous workload evaluations conducted in multiple jurisdictions. The team identified five types of tasks that officers completed across 17 case types and provided time estimates for the tasks necessary to adequately supervise offenders. **Role:** co-PI. **Funding source:** Bureau of Justice Assistance, DOJ. **Amount:** \$500,000. **Duration:** 2014-2019

Project Safe Neighborhoods, District-Level Outreach (2008 to 2011)—*Principal Investigator*. The aim of this BJA project was to inform probation and parole officers of the dangers of gang violence, provide training for effective gang offender supervision, and conduct national research on gang-related issues. The project resulted in numerous training sessions, several publications, and a Web site devoted to community corrections gang supervision. **Role:** PI. **Funding source:** Bureau of Justice Assistance, DOJ. **Amount:** \$1,000,000. **Duration:** 2008-2011

Terrorism Awareness and Prevention: Training Community Corrections Officers and Prosecutors (2008 to 2012)—*Principal Investigator*. The U.S. Department of Homeland Security, via a subaward through the National District Attorneys Association, sought to provide training and technical assistance to community corrections and judicial officials. The team led dozens of training sessions and developed an online training curriculum. **Role:** PI. **Funding source:** Science and Technology Directorate, DHS. **Amount:** \$1,100,000. **Duration:** 2008-2012

Workload Allocation for Community Corrections Officers: Phase I (2007 to 2009)—*Principal Investigator*. The aim of this BJA project was to explore issues related to workload and caseload issues for community corrections organizations. The resulting white paper facilitated the development of Phase II of the project. **Role:** PI. **Funding source:** Bureau of Justice Assistance, DOJ. **Amount:** \$400,000. **Duration:** 2007-2009

Supervising Lower-Risk Sex Offenders: An Integrated Perspective (2006 to 2008)—*Principal Investigator*. The aim of this project for the National Institute of Corrections, Bureau of Prisons, was to train community corrections, law enforcement, and jail professionals about the multiple risk levels of sex offenders. The result of this project was a series of training sessions, several publications, and a CD-based training curriculum. **Role:** PI. **Funding source:** Bureau of Justice Assistance, DOJ. **Amount:** \$250,000. **Duration:** 2006-2008

Sex Offender Community-Based Supervision: Case Management Strategies and Tools (2005 to 2007)—*Principal Investigator*. The aim of this BJA project was to develop training on sex offender supervision for community corrections agencies and pilot test the training in multiple jurisdictions. This project

resulted in a sex offender supervision training curriculum and several policy-related publications. **Role:** co-PI. **Funding source:** Bureau of Justice Assistance, DOJ. **Amount:** \$400,000. **Duration:** 2005-2007
